

CLINKIT PRIVACY POLICY

DRAFT — ATTORNEY REVIEW REQUIRED. GetBriefed Inc/LLC d/b/a Clinkit. Effective {{Date}}.

1. What we collect. Account data (name, email, phone, password hash); addresses and geolocation (buyer drop-off; Runner GPS while online/delivering only); order contents; payment tokens (Stripe holds card data — we never see card numbers); photos Runners take as proof (receipt, delivered goods); device and log data; communications (in-app chat).

2. How we use it. To run the marketplace: price comparison near you, matching, delivery tracking, payment, fraud prevention (e.g., receipt-total vs charge checks, geofence verification), support, legal compliance (tax, 1099), and product improvement with aggregated/de-identified data.

3. Sharing. With the Runner/buyer on your order (first name, address as needed, photos); processors (Stripe, Avalara, AWS, Checkr for Runner checks, Twilio); store/price data providers receive queries, never your identity; authorities when legally required. **We do not sell or share personal information for cross-context behavioral advertising.**

4. Retention. Order records: as required for tax/audit (7 years, financial fields only). Runner GPS trails: deleted 30 days post-delivery. Chat: 90 days. Proof photos: 180 days or until dispute closes. Deleted accounts: purged within 30 days except legal holds.

5. Your rights (CCPA/CPRA — applied to all users regardless of state). Know/access/export (in-app: Profile → Export my data, or `GET /api/auth/me/export`); delete (Profile → Delete account); correct; limit use of sensitive PI (precise location is used only to provide the service — a permitted purpose); non-discrimination. We honor Global Privacy Control signals on the web app. Requests: privacy@getbriefed.example; verified within 45 days. Authorized agents accepted per CCPA.

6. EU/UK visitors (GDPR). Legal bases: contract (service), legitimate interest (fraud, security), consent (marketing). Rights of access, rectification, erasure, portability, restriction, objection; complaints to your supervisory authority. We do not target the EU/UK at launch; data is processed in the United States.

7. Security. TLS in transit, encryption at rest (RDS/S3), bcrypt password hashing, least-privilege access, secrets in AWS Secrets Manager, audit logging of admin actions. Breach notification per applicable law without undue delay.

8. Children. Not directed to under-16s; we do not knowingly collect their data.

9. Changes. Material changes announced in-app 14 days ahead; archive of prior versions available on request.

Contact. GetBriefed Inc/LLC d/b/a Clinkit — privacy@getbriefed.example (activate real inbox before launch; also update §11 of the Buyer ToS).
