

Insurance Requirements Checklist

Budget reality: a \$1M/\$2M general-liability + cyber + E&O bundle for a pre-revenue tech marketplace typically quotes **\$120–350/month** from digital brokers (Vouch, Embroker, Hiscox, Next). The \$5k budget carries the first ~2 months (\$350 line); renewals come from revenue. Occupational-accident (Prop 22) is volume-priced per engaged hour — quote it the week live orders begin, not before.

Platform (GetBriefed Inc/LLC) — buy

- ☐ **Cyber liability** (\$1M) — data breach, ransomware. Required before storing real buyer PII at scale.
- ☐ **Tech E&O / professional liability** (\$1M) — wrong-price claims, platform errors.
- ☐ **General liability** (\$1M/\$2M) — usually bundled ~free with the above.
- ☐ **CA Prop 22 occupational-accident coverage** (\$1M per occurrence) for engaged Runners — REQUIRED in CA once live; quote via gig-specialty brokers (e.g., Buckle, OneBeacon programs). This is the one policy that scales with orders; per-delivery cost est. \$0.05–0.15 (feeds unit economics — tracked in finance model).
- ☐ Directors & officers — DEFER until fundraise (investors will require; ~\$3–5k/yr).
- ☐ Workers' comp — not required with zero W-2 employees; revisit at first hire.

Runner (attested in ICA §6 — verified at onboarding)

- ☐ Valid driver's license + vehicle registration (photo upload).
- ☐ **Auto liability at or above state minimum** (declarations-page upload; OCR check for expiry). The ICA squarely places commercial-use gap risk on the Runner; the onboarding flow must display the personal-auto-exclusion warning verbatim.
- ☐ The "1M auto + GL per Runner" aspiration is **not enforceable at launch** — typical gig workers don't carry commercial auto; requiring it would zero the Runner supply. Mitigation stack instead: platform occupational-accident policy + contingent-liability rider (quote with the cyber/E&O bundle) + strict photo/GPS proof reducing claim surface.

Operational gates

- ☐ No Runner activates without: license, registration, insurance declarations, background check clear, signed ICA + FCRA consent.
- ☐ Policy expiry watcher: onboarding stores expiry dates; ops runbook has a weekly re-verification query.
- ☐ Certificates of insurance saved to S3 `compliance/` with 7-year retention.
